FIND YOUR FLOW STATE

At Relex Ski, we believe the ultimate skiing experience isn't about battling nature, but becoming one with it. Yet, the pressure, fatigue, and distractions caused by ill-fitting gear prevent many skiers from achieving this state of flow.

That's why we focus on one thing: transforming ultimate comfort into your performance advantage through engineering innovation. We redesign every product—from seamless helmets to crystal-clear goggles—to address one core pain point: letting you forget your gear exists entirely, so you can immerse yourself in the pure joy of skiing.

Relex Ski helps you Ski Relaxed, achieving the perfect balance of focus and ease.

Company Representative

Lucien
CEO

Lucien, is an avid skier who founded this company based on a simple observation: "When your gear makes you uncomfortable, you can't enjoy the pure joy of skiing." His vision was to shatter the conventional wisdom that high performance and ultimate comfort couldn't coexist. He led his team with a singular mission: to transform the subjective feeling of "relaxation" into an objective, tangible reality within Relex Ski products through human-centered design and engineering innovation.

Pepper
COO

Pepper, Chief Operating Officer, a practitioner who seamlessly integrates precision engineering with efficient supply chain management. He is the perfect executor of the CEO's vision, responsible for translating the core concept of "comfort" into mass-producible, high-quality products with pinpoint accuracy. He oversees every step from material procurement to production implementation, ensuring that every piece of equipment bearing the RelexSki logo delivers on our comfort promise to users on the slopes.

Daniel
PMP

An exceptional coordinator with deep expertise in the manufacturing process of ski equipment, responsible for transforming design blueprints into high-quality, mass-producible products. His/her work spans the entire lifecycle—from concept to delivery—ensuring every Relex Ski project is completed on time and within budget, while fully meeting our stringent standards for "comfort engineering."

ABOUT US

- Integrity guides every decision.
- Quality defines every product.
- Innovation drives every solution.

Relex Ski Gear Founded in 2011 and headquartered in Shenzhen and Hong Kong, we specialize in providing high-quality ski sports gear and professional sourcing services for global brands.

Over the years, we have supported customers with premium ski helmets, ski goggles, ski poles, and advanced carbon-fiber products. We work as a trusted purchasing agent and R&D partner, collaborating closely with 10+ long-term manufacturing partners to deliver reliable, cost-effective solutions. For customers unable to visit China, we provide transparent on-site inspections, supplier verification, and full project follow-up to ensure peace of mind.

We handle supplier qualification, factory audits, product inspection, shipment arrangement, and cost-effective product development. We also offer English and French translation support, ensuring seamless communication throughout every project.

If you're looking for a trusted supplier in China for ski equipment sourcing or OEM/ODM development, we are your reliable partner to deliver high-performance products, competitive pricing, and worry-free supply chain service. Let's build global success together.

OUR SERVICES

Ski Gear Sourcing & Supplier Management

We help global brands source ski helmets, goggles, ski poles, carbon fiber products, and other ski gear directly from trusted factories in China. We manage supplier comparison, price negotiation, lead time evaluation, and production follow-up to ensure secure and cost-effective purchasing.

Factory Evaluation & Quality Control (ISO 9001)

With professional CPPM/CPP and ISO 9001 evaluation experience, we conduct factory audits, production supervision, and product inspections. We ensure that overseas buyers receive real quality, not empty promises, even without traveling to China.

OEM/ODM Product R&D and Small-Cost Development

From concept to mass production, we support new product development, mold redesign, material selection, and cost optimization. We work with deeply cooperative factories to help brands create custom ski gear with small investment and high performance.

Logistics, Documentation & Shipment Coordination

We handle shipping arrangements, export documents, packaging requirements, and customs preparation. Our management ensures a smooth delivery process, saving customers time, risk, and communication burden.

Bilingual (English/French) Communication Support

With fluent English and French communication, we bridge overseas clients with Chinese manufacturers. We eliminate misunderstandings, protect project accuracy, and keep all cooperation transparent and clearly documented.

SKI HELMETS
SAFETY MEETS COMFORT
